

Lumber Grading Rules

- All lumber will have **NO** mold, mud, or rocks.
- All lumber will be dimensionally accurate within ¼” end to end.
- All lumber will be square within 1/16” in 16” (short end of a framing square)
- Seasoning checks (separations of the wood along the grain) are not considered a defect and will be accepted.
- All lumber will have sound knots that are no larger than ½ the face of the timber.
- There will be no shake longer than ½ length and depth of the timber.
- There will be no splits longer than the width of the timber.
- All lumber will have no checks over 1/32” wide and 10” long.
- All lumber will have no wane over ¼” of any face for a short distance.

****Any lumber that does not meet this criteria will be rejected and not shipped out****
